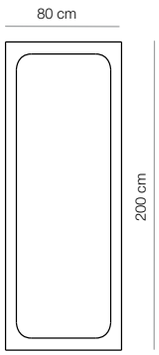
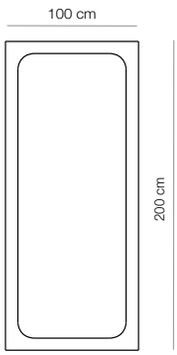
SHOWERS

Tuberose SILK-SCREEN GLASS SHOWER WALL



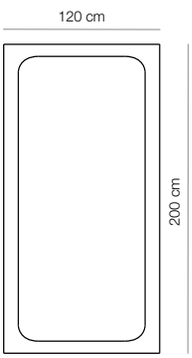
SILK-SCREEN GLASS SHOWER WALL
(cm 80 x 200)

Tuberose 80 Black	
code **HA80-N**	price € 540
Tuberose 80 White	
code **HA80-B**	price € 540



SILK-SCREEN GLASS SHOWER WALL
(cm 100 x 200)

Tuberose 100 Black	
code **HA81-N**	price € 630
Tuberose 100 White	
code **HA81-B**	price € 630



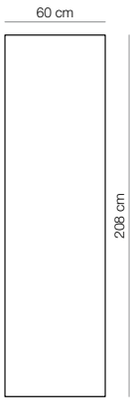
SILK-SCREEN GLASS SHOWER WALL
(cm 120 x 200)

Tuberose 120 Black	
code **HA82-N**	price € 720
Tuberose 120 White	
code **HA82-B**	price € 720

Shower walls are made of very light tempered float safety glass, 8 mm thick, with anti-scale treatment and double silk-screen printing.
All shower walls are reversible. Shower walls can be used with Bisazza shower trays or other commercially available trays, or can be mounted directly over the floor (wet room).
Shower walls can be mixed and matched (see example on page 12) using stabiliser bars, wall-mounted compensation profiles (either 10 or 20 mm), and angle brackets, if two glass walls need to be joined.
Shower walls can be installed individually, for use with a compensation profile and a 100 cm stabiliser bar.

MARBLE WALL

Mimosa MARBLE WALL



MARBLE WALL (60 x 208 cm)

Mimosa 60 Black	
code **HA94-N**	price € 845

MATERIAL CHARACTERISTICS AND TECHNICAL SOLUTIONS USED
THE HAYON COLLECTION

TABLES
Washbasin table in high-density composite material, with steel frame and barrier-coated MDF (medium density fiberboard: a wood by-product treated with structural adhesives) top. With openings for sink and taps.
White or black **finish**, polished and brushed lacquer.

TABLETOP
Top in original Carrara marble (white finish) or Marquinia marble (black finish). By its very nature, every piece of marble has different colours and striations, and these are proof that each item is natural and unique. Marble thickness: 2 cm. Designed with holes for basin and taps.
Polished **finish** and chamfered edges.
Undertop structure in high-density composite material, with steel parts and barrier-coated MDF (medium density fiberboard: a wood by-product treated with structural adhesives) top. With openings for sink and taps.
White or black **finish**, polished and brushed lacquer.

WASHBASIN
Washbasin made according to exclusive design in ceramic.
Single colour finish achieved using paste.
Composite finish using molten precious metals which, once baked and solidified, provide the same surface finish as a 24-carat gold or platinum alloy applied on top. Precious metals are applied by hand to guarantee a unique product.
Cleaning: to clean precious metal finishes, we suggest methylated spirit or special cleaners for glass/mirrors and microfibre or cotton cloths.
NEVER EVER use products containing any sort of acid and/or abrasive cloths.
Standard fittings: drain and drain trap of polished chrome-plated brass ALWAYS included with sink.
Optional extra: glossy copper drain and drain trap treated with rustproof paint (for an additional fee).

TABLE SUPPORT STRUCTURE (COLUMBINE, CROCUS)
Support bars for tables made of aluminium pipe, with molten aluminium joins.
Chrome and copper **finish**.

TABLE SUPPORT STRUCTURE (ASPHODEL)
Structure made of beech and high-density composite material with steel frame.
White or black **finish**, polished and brushed lacquer.

WALL-HUNG WASHBASIN DRAWER UNIT
MDF **drawer unit** can be perfectly adjusted and are fitted with hooks for wall mounting (height, lateral inclination, and depth all adjustable). Drawer interior with window for housing drain trap.
Guides "Blum" with push opening and "Blumotion" automatic closing system. Easy gliding metal structure with retainer to stop drawers from falling out when opened all the way in accordance with EEC standards.
White or black **finish**, polished and brushed lacquer.

FREESTANDING DRAWER UNIT
Drawer unit with linden legs and MDF (medium density fiberboard: a wood by-product treated with structural adhesives) structure.
Guides "Blum" with push opening and "Blumotion" automatic closing system. Easy gliding metal structure with retainer to stop drawers from falling out when opened all the way in accordance with EEC standards.
White or black **finish**, polished and brushed lacquer.

DRAWER UNIT TOP
Top in original Carrara marble (white finish) or Marquinia marble (black finish). By its very nature, every piece of marble has different colours and striations, and these are proof that each item is natural and unique. Marble thickness: 2 cm. Designed with holes for basin and taps.
Polished finish and chamfered edges.

DRAINS / DRAIN TRAPS
Drain trap made of brass 1"¼ Ø 32 mm, permitting easy wall-mounted installation, guaranteeing height adjustment with an excursion of 105 mm.
Pilers includes an UP&DOWN waste without overflow
Finish (for drain and drain trap) glossy chrome (standard) or glossy copper with rust-proof paint (optional for additional charge).
Standard fittings: drain and drain trap of polished chrome-plated brass ALWAYS included with sink.
Optional:
- special 1"¼ Ø 40 mm drain trap (for additional charge).
- open overflow

CERAMIC LIGHT FIXTURES AND MAGNIFYING MIRRORS
White **ceramic** paste and two firings (three firings for precious metal finishes using gold and platinum).
Cleaning: when cleaning ceramics, we recommend using methylated spirit or special cleaners for glass/mirrors and microfibre or cotton cloths.
NEVER EVER use products containing any sort of acid and/or abrasive cloths.

ELECTRICAL WIRING
Built using materials compliant with the latest EEC / UL regulations to guarantee the best safety. International Protection Rating (IP) is shown on every single item.

MIRRORS
Rectangular mirrors 5 mm thick with chamfered edges and frames made of polished, lacquered MDF with adjustable wall mountings.
Stainless steel mirrors AISI 304, 1.5 mm thick with frontal mirror finish protected by film, brushed tubular AISI 304 support with holes for wall mounting either horizontally or vertically.
Cleaning: we recommend methylated spirit or special cleaners for glass/mirrors and microfibre cloths. NEVER EVER use products containing any sort of acid and/or abrasive cloths.
Jointed magnifying mirrors 2x with ceramic (for codes HA12- and HA26-) or MDF supports, polished lacquer.

SHELVES
Shelves in high-density composite material with features made of Carrara marble (white finish) or Marquinia marble (black finish). Thickness about 4 cm. By its very nature, every piece of marble has different colours and striations, and these are proof that each item is natural and unique. Shelf attachment is by pressure, with hidden wall mountings.

BATHTUBS
Single colour acrylic **bathtub** in paste reinforced with fibre glass mesh and with integrated adjustable feet to ensure the tub is perfectly level.
Filling capacity: 275 litres (tub HA31) - 248 litres (tub HA163)
Bathtub supplied with UP&DOWN system and hidden overflow trap.
Outside frame made of MDF with four legs **made of** high-density composite material and adjustable feet to ensure the tub is always level; tub coated with black or white polyurethane gloss paint (according to model).
Standard fittings for TUB HA31: the tub is fitted with 3 removable containers which may be set into it to contain cleaning products, fragrance dispensers, towels, plants, flowers, etc.
Optional accessories (for fitting over the three removable basins): Carrara marble (white) or Marquinia marble (black covers).
Weight: 80 kg (HA31) - 70 kg (HA163)

SHOWER BOXES (FIXED WALLS)
Safety tempered float **glass**, 8 mm thick, with anti-scale treatment and black or white silk-screen printing. With matching seals.
White or black lacquered aluminium **compensation profiles**, 25 mm thick (can be extended a further 10 mm) and 35 mm thick (can be extended a further 20 mm).
Black or white lacquered aluminium **stabilising bar**.
Original Carrara marble (white finish) or Marquinia marble (black finish) walls. By its very nature, every piece of marble has different colours and striations, and these are proof that each item is natural and unique.
Comes with matching Bisazza shower trays or other trays, or for fitting directly on the floor.

SHOWER TRAYS
Shower tray made of Carrara marble (white finish) or Marquinia marble (black finish) and final impregnation. By its very nature, every piece of marble has different colours and striations, and these are proof that each item is natural and unique.
Shower trays may be installed above the floor or at floor level.
Waste outlet, Ø 90 mm, with good flow rate (35 litres/min).

CABINETS
Large cabinet (HA06) made of HDF with four solid linden legs and adjustable feet to ensure the unit is always level.
Small cabinet (HA05, HA72) made of high-density composite material with steel frame and parts made of HDF with adjustable feet to ensure the unit is always levelled.
Very light and grey tempered float safety **glass**, 4, 6, or 8 mm thick (for models containing glass).
Polished and brushed lacquered **finish**.
Colours: black and white gloss 100.

TAPS
Single-lever **mixer** with 1"¼ brass UP&DOWN waste.
Finishes: polished chrome, polished black lacquer, polished white lacquer.
High-tech "Vernet" **thermostatic cartridge** with long-life micro-perforated filters and anti-scalding safety system, high reaction speed for re-establishing water temperature and keeping it constant.
Neoperl SLC **Aereator** with self-cleaning silicone anti-lime scale membrane and built-in limiting device for saving water.
Washbasin/bidet drain made entirely out of brass with G 1"¼ connection.
Tub/shower taps with DSC® bypass system operating with a minimum pressure of 0.5 bar.
Inspectable anti-lime scale **showerhead**.
"Long life" **flexible hose** with anti-twisting device and multiple certifications.
Consumption, rate of flow, operating pressure
All basin and bidet taps
Recommended operating pressure: 1 to 5 bar.
Minimum operating pressure: 0.5 bar.
Maximum hot water temperature: 80°C.
Rate of flow: 8 litres a minute with 5 bar pressure.
Bathtub taps
Recommended operating pressure: from 1 to 5 bar.
Maximum hot water temperature: 80°C.
Rate of flow: 5.7 litres a minute with 0.5 bar pressure; 18.9 litres a minute with 5 bar pressure.
Shower mixer with complete set of wall-mounted showers and mixers.
Mod. HA77 (thermostatic)
Recommended operating pressure: from 1 to 3 bar.
Rate of flow: 10.5 litres a minute with 1 bar pressure; 18 litres a minute with 3 bar pressure.

MATERIAL CHARACTERISTICS AND TECHNICAL SOLUTIONS USED
THE WANDERS COLLECTION

NEW ANTIQUES TABLES
Washbasin table in composite material with parts in HDF.
Matte white or black lacquered finish.
Top in black or brilliant white glass. Silk-screen print for glass with holes to take washbasin and taps (where envisaged).
Polished finish and chamfered edges.

QUADRO DRAWER UNIT
Drawer unit in waterproof MDF with Tulipié solid woods parts. The washbasin version has a container drawer, while the drawer unit version has 2 drawers of different sizes. The front of the drawer is covered with Bisazza glass mosaic with hand-cut tesserae.
"Blum" guides with push opening and "Blumotion" automatic closing system. Sliding metallic structure according to latest end-of-course European regulations.
Aluminium alloy legs. White, polished and brushed lacquered gloss 100 finish.

QUADRO CABINET
Cabinet in MDF with Tulipié solid woods parts. Back covered with Bisazza glass mosaic.
Aluminium alloy legs. Black, polished and brushed lacquered gloss 100 finish.

WASHBASINS
Washbasin made according to exclusive design in ceramic. Single colour finish achieved using paste.
Cleaning: to clean ceramics, we suggest the usual cleaners for glass/ceramics.
Standard fitting: waste and trap are ALWAYS supplied as standard with washbasins.

DRAINS / DRAIN TRAPS
A brass trap, Ø 32 mm, allows for easy fitting to a wall and provides for a full 105 mm adjustment up and down.
UP&DOWN waste without overflow for WA04-WA05 washbasins.
UP&DOWN waste with overflow for WA06 washbasins.
Drain without stopper or overflow for WA04-WA05 washbasins only if fitted to free-standing tables. When fitting to free-standing table, waste and water pipes must be floor-mounted. (150 WA45 - 150 WA46)
Finish (for drains and drain taps) glossy chrome (standard).Standard fitting: waste and trap are ALWAYS supplied as standard for washbasins; for the free-standing version, they must be ordered separately. (150WA45 - 150WA46)
Optionals (with extra charge):
- special trap Ø 40 mm only for wall outlets.
- open overflow

MIRRORS
New Antiques mirror: frame made of high-density composite material with metal structure; closure HDF; mirror 5 mm thick. Wall mounting adjustable for levelling. Matte lacquer black or white.
Architectural mirror: frame made of high-density composite material with metal structure; closure MDF; mirror 4 mm thick. Wall mounting adjustable for levelling. Black or white lacquer, matte finish. The rectangular version may be mounted horizontally or vertically.
Quadro mirror: frame made of high-density composite material with metal structure; closure MDF; mirror 4 mm thick. Wall mounting adjustable for levelling. Black or white lacquer, polished and brushed gloss 100 finish.

BATHTUB
Fibre glass bathtub with integrated adjustable feet to ensure the tub is perfectly level. Polished lacquer finish with PU paint, RAL 9003.
Filling capacity: Approximately 300 litres (66 imp. gallons).
Bathtub supplied with UP&DOWN waste and hidden overflow trap. Filling with water: from pipe at end of bathtub.
Weight: 95 kg (without taps).
Please note: the bathtub may only be supplied with Bisazza taps WA24-R or WA24-C.

ARCHITECTURAL CABINETS
HDF units and frames with adjustable wall mountings. Mirror 4 mm thick. Matte white or black lacquered finish.
Please note: both the small and the rectangular version are reversible (i.e. they can be mounted with the door opening to the left or the right).

TAPS
Single-lever mixer with 1"¼ brass UP&DOWN waste.
High-tech "Vernet" thermostatic cartridge with long-life micro-perforated filters and anti-scalding safety system, high reaction speed for re-establishing water temperature and keeping it constant. Neoperl SLC Aereator with self-cleaning silicone anti-lime scale membrane and built-in limiting device for saving water.
Washbasin/bidet waste made entirely out of brass, with G 1"¼ fitting. Bathtub/shower taps with DSC® running at a minimum pressure of 0.5 bar.
Inspectable anti-lime scale showerhead.
"Long life" flexible hose with anti-twisting device and multiple certifications.
Finishes: polished chrome with grips envisaged, polished or Red RAL 3020 CHROME finish
Consumption, rate of flow, operating pressure
Washbasin and bidet taps (WA20 – WA34 – WA21 – WA23)
Recommended operating pressure: from 1 to 5 bar.
Minimum operating pressure: 0.5 bar.
Maximum hot water temperature: 80°C.
Rate of flow: 8 litres a minute with 5 bar pressure.
Bathtub taps (WA24 – WA25)
Recommended operating pressure: from 1 to 5 bar.
Maximum hot water temperature: 80°C.
Rate of flow: 5.7 litres a minute with 0.5 bar pressure; 18.9 litres a minute with 5 bar pressure.
Thermostat unit for shower (WA26)
Recommended operating pressure: from 1 to 3 bar.
Rate of flow: 10.5 litres a minute with 1 bar pressure; 18 litres a minute with 3 bar pressure.

Shower heads WA35 – WA37
Recommended operating pressure: from 0.5 to 1.5 bar.
Rate of flow: 11.40 litres a minute with 0.5 bar pressure; 14.3 litres a minute with 1.5 bar pressure.

CHANDELIER-SHOWER
Chrome-plated stainless steel and lead crystal. Fitted with anti-scale head and throttle. Low-voltage 12V LED illumination. Fitted with special 100-240V 50-60 Hz
transformer. Protection Rating IP65. CE certificates.

ACCESSORIES
Brass with polished chrome finish (polished chrome or RAL 3020 red for codes WA16 – WA17).
14.3 litres a minute with 1.5 bar pressure.

MATERIAL CHARACTERISTICS AND TECHNICAL SOLUTIONS USED
THE NENDO COLLECTION

WOODEN SINKS
Sinks of Okumè plywood laminated with solid Siberian larch 15 mm thick on the bottom and 2 mm thick on the walls, treated with structural glues in accordance with standards EN 204/205 (group D3-D4 and Eo regulations) treated with a clear water-based primer for outdoor use.
Finish: tixotropic monocomponent clear water-based varnish for outdoor use (inside of sink); clear acrylic varnish (outside of sink).
The effect of continuity of the veins underlining the quality of the product is achieved by 'folding' the wood.
Like all other natural materials, wood has specific properties that underline its uniqueness. The presence of knots, traces of resin or differences in hues and veins should therefore be considered intrinsic properties of the material. The presence of these specific features does not alter or harm the product's use and durability in any way.
The process of oxidation typical of wood means that variations in colour and hue over time should be considered natural.
Standard fittings:
- drain without stopper and drain trap of polished chrome-plated brass ALWAYS included with sink
- 2 Okumè plywood containers with 2 mm Siberian larch veneer, dimensions 295x185x110 mm and 185x185x119 mm
- 1 white ceramic soap dish, dimensions 145x145x20 mm
- maintenance kit for restoring the bottom of the inside of the sink (1 250 ml container of tixotropic monocomponent clear water-based varnish for outdoor use, 1 abrasive pad, 1 pair latex gloves)
- wall-mounted sinks only: 1 polished steel wall bracket

Recommendations for use
- Do not position close to heat sources
- Do not use outdoors
- Avoid direct exposure to the sun's rays for long periods of time
- Use with blended hot and cold water at a maximum temperature of 60°C (140°F)
- Use the ceramic soap dish provided to avoid ongoing contact of any kind of soap, however neutral, with the wood
- Avoid prolonged contact with lotions, cosmetics or concentrated detergents, however neutral, as they may be absorbed by the wood
- Do not leave stagnant water in the sink: the drain is open, without a stopper, to ensure a constant flow of water. The bracket provided may be adjusted to ensure perfectly level installation. Incorrect installation may cause water to stagnate within the basin and over time may result in deposits of lime scale and MOLD. Bisazza shall not be held liable for any INCORRECT installation of the sink or for use of a drain and drain trap different from the original ones.
- IMPORTANT: continuous use of the wooden product guarantees the best temperature and humidity conditions for preserving it from damage over time; small cracks or slight surface splitting might appear over time, which does not in any case whatsoever preclude use of the product or the water seal.
- Do not leave the sink unused for prolonged periods.

Cleaning and maintenance
For ordinary cleaning, use only neutral soap and water. Do not use abrasive products or corrosive lotions (acetone, anti-lime scale products).
Every 6-12 months, use the kit provided for special maintenance, paying particular attention to areas in direct contact with water (inner walls and bottom of the basin).
Wherever necessary (with the appearance of growths, small cracks, stubborn dirt deposits...), restore the protective film using the water-based paint supplied with the kit and carefully following the instructions provided.
Storage and transportation
During transport and storage products must never be left exposed to freezing temperatures or to temperatures above 60°C, or exposed to other atmospheric agents.
Avoid direct exposure to the sun's rays.

BATHTUB
Tub of Okumè plywood laminated with solid Siberian larch 15 mm thick on the bottom and 2 mm thick on the walls, treated with structural glues in accordance with standards EN 204/205 (group D3-D4 and Eo regulations) treated with a clear water-based primer for outdoor use.
Finish: tixotropic monocomponent clear water-based varnish for outdoor use.
The effect of continuity of the veins underlining the quality of the product is achieved by 'folding' the wood.
Like all other natural materials, wood has specific properties that underline its uniqueness. The presence of knots, traces of resin or differences in hues and veins should therefore be considered intrinsic properties of the material. The presence of these specific features does not alter or harm the product's use and durability in any way.
The process of oxidation typical of wood means that variations in colour and hue over time should be considered natural.
Filling capacity: 270 litres.
Tub drain with UP&DOWN system and hidden "overflow" control. BISAZZA SPA shall not accept any liability for damage caused by use of different drains
Standard fittings:
- 2 containers to be fixed onto the outside of the tub in the established position
- built-in adjustable feet for guaranteeing perfect flatness of the tub and containers
- maintenance kit for restoring the bottom of the inside of the sink (1 250 ml container of tixotropic monocomponent clear water-based varnish for outdoor use, 1 abrasive pad, 1 pair latex gloves)

Weight: about 100 kg.
Recommendations for use
- Do not position close to heat sources
- Do not use outdoors
- Avoid direct exposure to the sun's rays for long periods of time
- Use with blended hot and cold water at a maximum temperature of 60°C (140°F)
- Avoid prolonged contact with lotions, cosmetics or concentrated detergents, however neutral, as they may be absorbed by the wood
- Do not leave stagnant water: the tub is provided with adjustable feet to ensure perfectly level installation. Incorrect installation may cause water to stagnate within the basin and over time may result in deposits of lime scale and MOLD. Bisazza shall not be held liable for any INCORRECT installation of the tub.
- IMPORTANT: continuous use of the wooden product guarantees the best temperature and humidity conditions for preserving it from damage over time; small cracks or slight surface splitting might appear over time, which does not in any case whatsoever preclude use of the product or the water seal. Do not leave the tub unused for prolonged periods (more than 2 months).
- Empty and rinse the tub after each use (use for a maximum of 2-3 hours)

Cleaning and maintenance
For ordinary cleaning, use only neutral soap and water. Do not use abrasive products or corrosive lotions (acetone, anti-lime scale products).
Every 6-12 months, use the kit provided for special maintenance, paying particular attention to areas in direct contact with water (inner walls and bottom of the basin).
Wherever necessary (with the appearance of growths, small cracks, stubborn dirt deposits...), restore the protective film using the water-based paint supplied with the kit and carefully following the instructions provided.

Storage and transportation
during transport and storage products must never be left exposed to freezing temperatures or to temperatures above 60°C, or exposed to other atmospheric agents.
Avoid direct exposure to the sun's rays.

MIRRORS
Okumè plywood frame with 2 mm Siberian larch veneer, treated with structural glues in group D3; mirror 5 mm thick; adjustable wall mounting to ensure 'levelling'. The mirror may be installed either vertically or horizontally.
Finish: clear acrylic varnish
The effect of continuity of the veins underlining the quality of the product is achieved by 'folding' the wood.
Recommendations for use
- Do not use outdoors
- Avoid direct exposure to the sun's rays for long periods of time
- Avoid prolonged contact with lotions, cosmetics or concentrated detergents, however neutral, as they may be absorbed by the wood

Cleaning and maintenance
For ordinary cleaning, use only neutral soap and water. Do not use abrasive products or corrosive lotions (acetone, anti-lime scale products).
Storage and transportation
During transport and storage products must never be left exposed to freezing temperatures or to temperatures above 60°C, or exposed to other atmospheric agents.
Avoid direct exposure to the sun's rays.

SLIDING CABINETS
Okumè plywood cabinet with 2 mm Siberian larch veneer, treated with group D3 structural glues; visible structure painted RAL 9003 matt white.
Wood finish: clear acrylic varnish.
The effect of continuity of the veins underlining the quality of the product is achieved by 'folding' the wood.
The process of oxidation typical of wood means that variations in colour and hue over time should be considered natural.

Standard fittings:
- 3 covers to rest on the first drawer
- built-in adjustable feet to ensure perfectly flat installation of the cabinet
Recommendations for use:
- Do not use outdoors
- Avoid direct exposure to the sun's rays for long periods of time
- Avoid prolonged contact with lotions, cosmetics or concentrated detergents, however neutral, as they may be absorbed by the wood
Cleaning and maintenance
For ordinary cleaning, use only neutral soap and water. Do not use abrasive products or corrosive lotions (acetone, anti-lime scale products).
Storage and transportation
During transport and storage products must never be left exposed to freezing temperatures or to temperatures above 60°C, or exposed to other atmospheric agents.
Avoid direct exposure to the sun's rays.

STOOL
Stool of Okumè plywood with 2 mm Siberian larch veneer, hot bent.
Wood finish: clear acrylic varnish.
The process of oxidation typical of wood means that variations in colour and hue over time should be considered natural.
Recommendations for use
- Do not use outdoors
- Avoid direct exposure to the sun's rays for long periods of time
- Avoid prolonged contact with lotions, cosmetics or concentrated detergents, however neutral, as they may be absorbed by the wood
Cleaning and maintenance
For ordinary cleaning, use only neutral soap and water. Do not use abrasive products or corrosive lotions (acetone, anti-lime scale products).
Storage and transportation
During transport and storage products must never be left exposed to freezing temperatures or to temperatures above 60°C, or exposed to other atmospheric agents.
Avoid direct exposure to the sun's rays.

WASHBASIN SHELF
Okumé plywood shelf with 2 mm Siberian larch veneer, treated with group D3 structural glues.
Standard fittings: 1 polished steel wall bracket.
Wood finish: clear acrylic varnish. The process of oxidation typical of wood means that variations in colour and hue over time should be considered natural.
Recommendations for use
- Do not use outdoors
- Avoid direct exposure to the sun's rays for long periods of time
- Avoid prolonged contact with lotions, cosmetics or concentrated detergents, however neutral, as they may be absorbed by the wood
Cleaning and maintenance
For ordinary cleaning, use only neutral soap and water. Do not use abrasive products or corrosive lotions (acetone, anti-lime scale products).
Storage and transportation
During transport and storage products must never be left exposed to freezing temperatures or to temperatures above 60°C, or exposed to other atmospheric agents.
Avoid direct exposure to the sun's rays.

WALL-MOUNTED CABINET
Okumè plywood cabinet with 2 mm Siberian larch veneer, treated with group D3 structural glues; supplied with hooks for wall mounting to ensure the cabinet is perfectly level.
Wood finish: clear acrylic varnish.
The effect of continuity of the veins underlining the quality of the product is achieved by 'folding' the wood.
The process of oxidation typical of wood means that variations in colour and hue over time should be considered natural.

Recommendations for use
- Do not use outdoors
- Avoid direct exposure to the sun's rays for long periods of time
- Avoid prolonged contact with lotions, cosmetics or concentrated detergents, however neutral, as they may be absorbed by the wood

Cleaning and maintenance
For ordinary cleaning, use only neutral soap and water. Do not use abrasive products or corrosive lotions (acetone, anti-lime scale products).

Storage and transportation
During transport and storage products must never be left exposed to freezing temperatures or to temperatures above 60°C, or exposed to other atmospheric agents.
Avoid direct exposure to the sun's rays.

SHELVES
Solid Siberian larch shelves with 2 mm Siberian larch veneer, treated with group D3 structural glues; visible structure painted RAL 9003 matt white.
Wood finish: clear acrylic varnish.
The process of oxidation typical of wood means that variations in colour and hue over time should be considered natural.
Standard fittings: 2 special aluminium hooks for wall anchorage and prevention of tipping

Recommendations for use
- Do not use outdoors
- Avoid direct exposure to the sun's rays for long periods of time
- Avoid prolonged contact with lotions, cosmetics or concentrated detergents, however neutral, as they may be absorbed by the wood

Cleaning and maintenance
For ordinary cleaning, use only neutral soap and water. Do not use abrasive products or corrosive lotions (acetone, anti-lime scale products).

Storage and transportation
During transport and storage products must never be left exposed to freezing temperatures or to temperatures above 60°C, or exposed to other atmospheric agents.
Avoid direct exposure to the sun's rays.

TOWEL HANGERS
Towel rack made of steel painted RAL 9003 matt white.
Standard fittings: 2 special aluminium hooks for wall anchorage and prevention of tipping

Recommendations for use
- Do not use outdoors
- Avoid prolonged contact with lotions, cosmetics or concentrated detergents, however neutral.

Cleaning and maintenance
For ordinary cleaning, use only neutral soap and water. Do not use abrasive products or corrosive lotions (acetone, anti-lime scale products).

CRISTALPLANT® SINK COUNTERTOP
Cristalplant® sink countertop with RAL 9003 matt white steel frame covered with larch wood and clear varnished matt aluminium inserts.
Wood finish: clear acrylic varnish.
The process of oxidation typical of wood means that variations in colour and hue over time should be considered natural.
CRISTALPLANT® is a unique technologically advanced composite material containing a high percentage of natural minerals (ATH derived from bauxite) and a small percentage of pure polyester and acrylic polymers; it is an inert, hypoallergenic, non-toxic material.
CRISTALPLANT® is 100% recyclable, fireproof (class 1), with excellent UV resistance, compact and non-porous, hygienic and strong with a pleasant velvety feel like natural stone.
CRISTALPLANT® is 100% restorable, meaning its original appearance may be restored with ordinary detergent and an abrasive pad, easily removing stains caused by personal hygiene products and common cleaning products. Environmentally friendly because it is a long-lasting, restorable material.
Standard fittings:
- drain and drain trap of polished chrome-plated brass ALWAYS included with sink.
- Cristalplant® maintenance kit (1 abrasive pad)
- 2 polished steel wall brackets

Recommendations for use
- Do not use outdoors
- Avoid prolonged contact with lotions, cosmetics or concentrated detergents, however neutral, as they may stain the wood (may be absorbed by the wood).
- The drain provided is open, without a stopper, to ensure a constant flow of water. Bisazza shall not be held liable for damage if the sink is installed with a drain and drain trap different from the original ones.

Cleaning and maintenance
For ordinary cleaning of wood, use only water and a neutral detergent; do not use abrasive cleaning products or corrosive lotions (acetone, anti-lime scale products).
For ordinary cleaning of Cristalplant®, use a soft cloth dampened with an ordinary cleaning product, and be sure to rinse the surface well afterwards.
For in-depth cleaning of Cristalplant®, use the abrasive pad provided and follow the instructions in the maintenance kit.

MINERALMARMO® WASHBASIN
Washbasin made of Mineralmarmo®, fitted with wall-mounting bracket made of steel painted RAL 9003 matt white.
Mineralmarmo® is a technologically advanced composite material containing a high percentage of natural minerals (calcium carbonates and aluminium trihydrates) and polyester resin. The technical enamel film covering the surface of the material is polyester acrylate, which allows excellent resistance characteristics to be achieved.
Frequent cleaning of Mineralmarmo® ensures that its original beauty is maintained and also prevents signs of use over time.
Standard fittings:
- drain without stopper and drain trap of polished chrome-plated brass ALWAYS included with sink.
- 2 Okumè plywood containers with 2 mm Siberian larch veneer, dimensions 295x185x110 mm and 185x185x119 mm
- 1 white ceramic soap dish, dimensions 145x145x20 mm
- 1 painted steel wall bracket

Recommendations for use
- Do not use outdoors
- Avoid prolonged contact with lotions, cosmetics or concentrated detergents, however neutral, as they may stain the wood (may be absorbed by the wood).
- The drain provided is open, without a stopper, to ensure a constant flow of water. Bisazza shall not be held liable for damage if the sink is installed with a drain and drain trap different from the original ones.

Cleaning and maintenance
To remove most stains, scale and grime that normally deposit on the surface, just clean with a cloth or moist non-abrasive sponge and common non-abrasive detergents (better yet if gel). Thoroughly rinse the surface after cleaning.
Avoid using abrasive detergents and sponges when cleaning. Do not use metallic scrapers. This product has good heat resistance, however avoid setting hot objects on the surface or emptying boiling liquids.
The use of aggressive chemical solvents such as acetone, trichloroethylene, solvents, acids and strong bases is advised against. Some substances, like ink, cosmetics and dyes, may release colouring agents, so prevent them from coming into contact with the surface. Do not set lit cigarettes on the surface, and do not directly cut anything directly on the surface.
For ordinary cleaning of wood, use only water and a neutral detergent; do not use abrasive cleaning products or corrosive lotions (acetone, anti-lime scale products).

LAMPS AND LIGHT FIXTURES
Central brass body worked and polished to a chrome finish.
Blown glass **lampshade**, painted with a chrome finish on the outside and white on the inside; also available with a white or black finish on the outside.
As they are entirely handmade, the lampshades may differ slightly in shape and size, and their surfaces may be irregular.
Steel **suspension cables** with snap-together connection, adjustable height.
Lighting
Suspension lamp / Wall lamp
LED Spot MR16 12V 6W GU5,3 3000°k WARM WHITE.IP20 production, with 250-110 VAC power supply unit included.
Light fixtures
LED Spot PAR 220V 5W E14 3000°k WARM WHITE. IP20 production.

TAPS
Our taps are made exclusively from brass with a chemical composition that meets strict international standard, and all non-metallic tap components, as well as the lubricants used to assemble them, meet the strictest standards for use with food. In addition, only material with the zinc removed is used for built-in parts. Chrome plating surface treatment by galvanic deposit of chrome and nickel meets the requirements of European standards.
Mixer with single control and compact 25mm cartridge.
Retractable Neoperl CACHE' **aerators** with self-cleaning silicon anti-lime scale membrane. Models NE33-NE29-NE32 have a built-in flow reducer to save water.
Shower taps with DSC® bypass system operating with a minimum pressure of 0.5 bar.
High-tech VERNET **thermostatic cartridge** with long-life micro-perforated filters and anti-scalding safety system, high reaction speed for re-establishing water temperature and keeping it constant.
Inspectable anti-lime scale **showerhead**.
"Long life" **flexible hose** with anti-twisting device and multiple certifications.
Sink/bidet drain made entirely out of brass with G 1"¼ connection.
Finishes: gloss chrome
Reference standards: Mechanical mixers standard EN200 – Thermostatic mixers standard EN1111
Consumption, rate of flow, operating pressure
Single control sink mixer NE33- NE29
Recommended operating pressure: from 1 to 5 bar. Maximum hot water temperature: 80 °C. Rate of flow: 8 litres a minute with 3 bar pressure.
Single control bidet mixer NE32
Recommended operating pressure: from 1 to 5 bar. Maximum hot water temperature: 80 °C. Rate of flow: 5.7 litres a minute with 3 bar pressure.
Freestanding outside tub/sink mixer NE30
Recommended operating pressure: from 1 to 5 bar. Maximum hot water temperature: 80 °C. Rate of flow: 21.1 litres a minute with 3 bar pressure; 27.6 litres a minute with 5 bar pressure.
Freestanding inside tub mixer NE35
Recommended operating pressure: from 1 to 5 bar. Maximum hot water temperature: 80 °C. Rate of flow: 21.2 litres a minute with 3 bar pressure; 24 litres a minute with 5 bar pressure.
Thermostatic unit for shower NE44-K
Recommended operating pressure: from 1 to 3 bar. Minimum operating pressure: 0.5 bar. Rate of flow: 10.5 litres a minute with 1 bar pressure; 18 litres a minute with 3 bar pressure.

DRAINS / DRAIN TRAPS
Drain trap made of brass 1"¼ Ø 32 mm, permitting easy wall-mounted installation, guaranteeing height adjustment with a large excursion.
Drain without stopper or overflow for wooden, Cristalplant® and Mineralmarmo® sinks
Drain with UP&DOWN outflow and overflow for Bidet with single tap
Finish (for drains and drain taps) glossy chrome (standard).
Standard fittings: drain and drain trap of polished chrome-plated brass ALWAYS included with sink.
Optional: special 1"¼ Ø 40 mm drain trap.

MATERIAL CHARACTERISTICS AND TECHNICAL SOLUTIONS USED
THE MAHDAVI COLLECTION

WASHBASIN
Washbasin made according to exclusive design in ceramic.
Single colour finish achieved using paste.
Cleaning: to clean ceramics we suggest the usual cleaners for glass/ceramics and microfibre or cotton cloths.
Standard fittings: drain and drain trap of polished chrome-plated brass ALWAYS included with sink.

WALL-HUNG WASHBASIN DRAWER UNIT
- **Do not use outdoors**
- **Avoid direct exposure to the sun's rays for long periods of time**
- Avoid prolonged contact with lotions, cosmetics or concentrated detergents, however neutral, as they may be absorbed by the wood.
Cleaning: to clean the polished lacquered parts you can use a non-abrasive, neutral, liquid detergent that you can dilute and apply with a microfiber cloth. NEVER USE POWDER OR ABRASIVE PRODUCTS, ABRASIVE SPONGES OR SHARP TOOLS.
Please avoid using bleach, acids and solvents such as nail polish remover.
To clean the ceramic parts please consider the instructions given for the washbasins.

MIRROR
- Do not use outdoors
- Avoid direct exposure to the sun's rays for long periods of time
- Avoid prolonged contact with lotions, cosmetics or concentrated detergents, however neutral, as they may be absorbed by the wood
Cleaning: to clean the polished lacquered parts you can use a non-abrasive, neutral, liquid detergent that you can dilute and apply with a microfiber cloth. NEVER USE POWDER OR ABRASIVE PRODUCTS, ABRASIVE SPONGES OR SHARP TOOLS.
Please avoid using bleach, acids and solvents such as nail polish remover.
To clean the ceramic parts please consider the instructions given for the washbasins.

BATHTUB
Fibre glass bathtub with integrated adjustable feet to ensure the tub is perfectly level. Polished lacquer finish with PU paint, RAL according to Pantone colours.
Filling capacity: approximately 200 litres.
Bathtub supplied with UP&DOWN nichel chrome-plated waste and hidden overflow trap.
Weight: 65 kg (without taps).
Cleaning: to clean the polished lacquered parts you can use a non-abrasive, neutral, liquid detergent that you can dilute and apply with a microfiber cloth. NEVER USE POWDER OR ABRASIVE PRODUCTS, ABRASIVE SPONGES OR SHARP TOOLS.
Please avoid using bleach, acids and solvents such as nail polish remover.
To clean the ceramic parts please consider the instructions given for the washbasins.

TAPS
Our taps are made exclusively from brass with a chemical composition that meets strict international standard, and all non-metallic tap components, as well as the lubricants used to assemble them, meet the strictest standards for use with food. In addition, only material with the zinc removed is used for built-in parts. Chrome plating surface treatment by galvanic deposit of chrome and nickel meets the requirements of European standards.
Double-lever washbasin mixer with 1/2" ceramic discs valve 180°.
Neoperl SLC **Aereator** with self-cleaning silicone anti-lime scale membrane and built-in limiting device for saving water.
4 hole deck mounted bath mixer with 1/2" ceramic discs valve 180°, with diverter, spout and pull-out anti-lime hand shower with "Long life" **flexible hose** with anti-twisting device and multiple certifications.
Reference standards: Mechanical mixers standard EN200
Consumption, rate of flow, operating pressure
Double-lever washbasin mixer Bling 1
Recommended operational pressure: 1-5 bar. Maximum hot water temperature: 80 °C. Rate of flow: 8 litres a minute with 5 bar pressure.
4 hole deck mounted bath mixer **Bling 3**
Recommended operational pressure: 1-5 bar. Maximum hot water temperature: 80 °C. Rate of flow: 21,5 litres a minute with 3 bar; 27,8 litres a minute with 5 bar pressure.

DRAINS / DRAIN TRAPS
Drain trap made of brass 1"¼ Ø 32 mm, permitting easy wall-mounted installation, guaranteeing height adjustment with a large excursion.
Pilers includes an UP&DOWN waste without overflow
Standard fittings: nichel chrome-plated brass drain and drain trap ALWAYS included with sink.

GENERAL TERMS OF SALE

INTRODUCTION
These general conditions:
(a) apply to all offers, estimates, sales, supplies, deliveries, as well as all measures and operations relating to or resulting from them taken or carried out by Bisazza S.p.a. and/or all/any of its overseas branch offices and/or all/any of the companies, whether Italian or foreign, in the Bisazza group (hereinafter referred to as "Bisazza" or the "seller"), submitted and/or entered into with its distributors and/or dealers and/or in any event professional subjects purchasing Bisazza products, not as final customers, but as part of their sales or business activities (hereinafter referred to as the "buyer").
(b) all buyers are deemed to be familiar with them and they form an integral part of the order.
(c) they cancel and in any event take precedence over any other conflicting clause printed and/or hand-written on orders, requests for offers or in the buyer's correspondence.

1) OFFER AND ACCEPTANCE
1.1 No offer made by Bisazza shall be treated as binding.
1.2 An order which is sent by the buyer to the seller in written form (also by fax, e-mail or other electronic means) shall become binding on Bisazza solely and exclusively when the company sends the buyer its signed order confirmation.
1.3 The supply shall include the materials and quantities of merchandise specified in the Bisazza order confirmation, which shall constitute the only document of reference when checking prices and quantities and shall have precedence over the offer and/or customer's order.
1.4 No request from the buyer for either cancellation or modification will be accepted by Bisazza once a period exceeding 4 days has elapsed from the date on which the order confirmation was issued, at which time it becomes irrevocable.

2) PRICES
2.1 The prices applying to Bisazza products are those indicated in the order confirmation.

3) PACKAGING AND DELIVERY OF MATERIAL
3.1 Standard packaging is included in the sale price.
3.2 Bisazza packaging is not guaranteed in any way to provide the merchandise and products with waterproof protection.

4) DELIVERY CONDITIONS
4.1 Dates for delivery are not peremptory, unless otherwise agreed in writing.
4.2 Delays do not therefore entitle the parties to make demands for damages or termination of the contract, even partially.
The delivery date shall be taken to be that on which the delivery note is issued, or that on which the customer is notified that the goods are ready for delivery.
4.3 Should force majeure prevent the seller from performing the contract, it may, at its discretion, without seeking the intervention of judicial authorities, either suspend execution until such time that the circumstances giving rise to the force majeure have ceased, or terminate the contract either in whole or in part, without seeking the intervention of judicial authorities and without being liable for damages.
4.4 Force majeure is taken to cover any circumstances beyond the seller's control which permanently or temporarily prevent the execution of the contract, such as war or threat of war, uprising, partial or general mobilisation, industrial strike, lack of raw materials, interruption in supply of goods by subcontractors, unforeseen events that affect the business, transportation difficulties, import or export restrictions, frost, fire, epidemic, natural or other disaster and other unforeseen restrictions that render the manufacturing or transportation of the goods either partially or totally impossible. The provisions of this article also apply when the aforementioned circumstances relate to factories, suppliers or other traders from whom the seller purchases goods or acquires services.
4.5 The Bisazza company shall not be held liable any longer once the goods are handed over to the carrier (against whom the buyer must direct any complaints it may have). Shipment, either by sea or road, of supplies abroad must satisfy the conditions established as each case arises, set out in Incoterms approved by the International Chamber of Commerce in 2000 and subsequent versions thereof.

5) PAYMENT CONDITIONS
5.1 Bisazza supplies must be paid for in full adopting the methods described in the order confirmation and/or in the invoice.
5.2 The terms contained in the order confirmation and/or in the sale invoices must be treated as peremptory and exceptions thereto shall only be permitted if a prior written agreement has been reached with the seller.
5.3 The Bisazza company is entitled to demand, at its absolute discretion, total payment in cash in advance when the order is made.

6) DEFAULT OR DELAYED PAYMENT
6.1 Once the payment date has fallen due, the buyer, if in breach of settlement, shall be considered automatically in default.
6.2 Delayed payment, even partial, of invoices issued by Bisazza shall therefore immediately give rise to liability for default interest at the official reference rate increased by seven points and shall entitle Bisazza to charge any out-of-court legal expenses it has incurred in order to recover the amount outstanding.
6.3 In the event of a delay on the part of the buyer or in the event that the seller has reason to fear that the buyer will breach its payment obligations, the seller may, without entitling the buyer to demand damages, without prejudice to any further rights or actions:
(a) demand payment in advance or a guarantee;
(b) refuse to process any other orders currently underway with the buyer;
(c) suspend or revoke, either in whole or in part, the execution of all supply contracts currently underway with the buyer or those connected with it, preceding or following it;
(d) revoke any favourable payment terms agreed upon, extending this to other contracts, thereby being entitled to demand immediately all sums currently owed by the buyer;
(e) suspend all obligations imposed upon it by any other contracts entered into with the buyer.

7) WARRANTIES AND SPECIAL CHARACTERISTICS OF MATERIAL
7.1 Bisazza warrants that its material conforms to the physical, chemical, mechanical and dimensional standards indicated in this catalogue/order.
7.2 The customer declares that it is aware of and expressly accepts the characteristics of the Bisazza product described, waiving the right to contest them in any way.

8) COMPLAINTS
8.1. Complaints mean any protests made by the buyer that refer to the quality of the goods or items supplied. When the goods are received, the buyer must check them or have them checked to ensure that they conform to contractual specifications.
8.2 The buyer may not claim that the goods supplied do not conform to the specifications contained in the order if it has failed to check the products in the manner described or has failed to notify the seller of the defect within the terms indicated in point 9.3 below.
8.3 The buyer must report defects in writing to the seller within and not beyond a period of 8 days from receipt of the goods, upon pain of forfeiture. In any event, the right to take action to enforce these rights shall, without prejudice to the term of 8 days, become statute-barred one year after delivery of the goods.
8.4 Complaints must be submitted in writing, giving the data contained in the order confirmation, the pack identification numbers and the invoice and bill of lading numbers.
8.5 If a complaint is made, the buyer must ensure that the contested goods are made available to technicians and experts sent by the seller.
8.6 In the event that a complaint is submitted in time and proves to be founded following checks carried out by Bisazza technicians, the company shall only be liable for replacing the non-conforming goods, without entitling the buyer to demand the rescission of the contract or the reduction of the sale price and/or damages and the reimbursement of costs incurred of any kind.

9) CONDITIONS APPLYING TO RETURN OF GOODS
9.1 The goods supplied may not be returned, even partially, unless prior written authorisation has been given by Bisazza.
9.2 In order to return goods, the company Bisazza must receive a written request from the buyer within eight days from receipt of the material. Requests received beyond that period will not be taken into consideration.
9.3 A request to return goods must reach the company Bisazza before the goods are installed, otherwise it will not be accepted.
9.4 Goods returned due to errors on the part of the customer (colour and/or quantity) or late variations to the order will not be accepted.
9.5 The return of goods without Bisazza's prior authorisation using the goods return authorisation form will not be accepted. As regards goods returned from within national territory, the return authorisation will indicate the transportation company that must handle the arrival of the goods at Bisazza's expense.
9.6 The goods must be returned in their original packaging, completely intact, loaded on pallets if necessary, and protected from damp.
9.7 If the returned goods reach the Bisazza warehouse in a damaged state, they will not be accepted.
9.8 The packaging must enclose a copy of the authorisation form with the final date for the goods to be returned clearly marked, as well as the buyer's transportation document which indicates, clearly and legibly, the quantity and description of the goods returned.
9.9 Bisazza reserves the right to charge any costs whenever, after the materials have been checked at its factory premises, the request for their return proves to be unfounded.

10) LIABILITY STEMMING FROM SUPPLIES
10.1 The seller shall never be held liable for consequential damages, including loss of profits, actual damage, loss of income and down time.
10.2 The limitations to liability described above do not apply in the event of fraud or serious fault on the part of the seller.
10.3 The buyer holds the seller harmless against any claims that may be put forward by third parties, including the seller's or buyer's employees, relating to the goods supplied.

11) RESPONSIBILITIES CONCERNING THE LAYING OF MATERIALS
11.1 Bisazza does not in any way supply the service of laying the mosaic along with the supply of the installation.
11.2 Bisazza therefore declines all responsibility for defects and/or flaws that may be attributed to laying operations. The company does not therefore accept complaints or demands for compensation of damage stemming from defects and/ or difficulties caused during laying operations that prejudice the use of the material supplied, if the physical, chemical, mechanical and dimensional characteristics of the said material conform to the standards established when it was ordered and supplied.

12) PATENTS, TRADEMARKS, DISTINCTIVE SIGNS, SOFTWARE
12.1 The buyer expressly recognises that the BISAZZA name and logo, its graphic composition and know how relating to the products supplied constitute intellectual and industrial property owned by BISAZZA S.P.A. and/or companies in the group protected by laws relating to copyright and industrial property.
Any improper use thereof shall be sanctioned in accordance with the law.
12.2 The buyer may not, under any circumstances, use, cancel or remove any indication relating to patents, trademarks, business names or origin affixed by Bisazza to the products supplied without its prior written authorisation.

13) APPLICABLE LAW - JURISDICTION AND COMPETENT AUTHORITIES
13.1 Any dispute stemming from these General Conditions and/or orders placed on the basis thereof shall be regulated, in so far as not covered by theses conditions of sale, exclusively by the laws of the country in which the Bisazza company signing the order confirmation is domiciled.
13.2 All disputes shall be referred to the exclusive jurisdiction of the ordinary courts of the state to which the Bisazza company signing the order confirmation belongs.
13.3 As an exception to any legal or customary criterion, exclusive jurisdiction is also given to the courts of the city in which the Bisazza company signing the order confirmation has its registered office.
