Inbani is a young Spanish company specialised in designing high-end products for bathroom spaces. Inbani has evolved into a leader in innovation thanks to a conviction to create products which truly benefit the well-being of the *customer*.

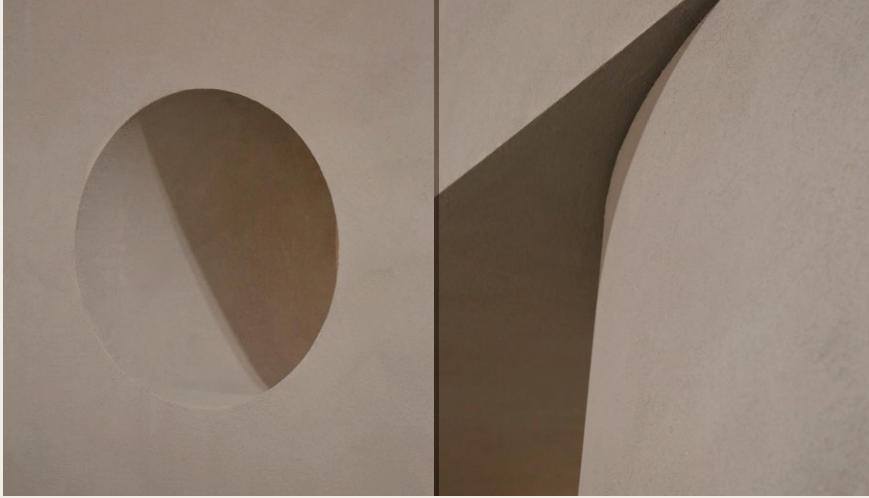

From our very beginning, we wanted to achieve the goal of being a company that offers inspiration, serenity and elegance within the world of bathrooms design. That is why we are committed to design minimalist products with the highest quality.

We are all about beauty, simplicity and minimalism, with the inspiration behind thousands of people to create pure and magical bathroom spaces.

It is not about how much but what you add. We are a new concept of functionality.

We are a new bathroom concept. We are Inbani.

CONTENTS

Since 2004, we have been working tirelessly to fulfil one of our main objectives: to design. The art of design has always fascinated us and motivated us to find unique creations that correspond to each client's needs, concerns, situation and vision. Doing this whilst creating timeless, everlasting pieces that correspond to a designer's characteristic is indispensable. Once these details have been resolved, we find ourselves having solved the puzzle of creativity and are reminded of why we do what we do; our purpose. Because without an objective there would be no purpose and without a purpose there would be no sense. Through closeness, tact and dedication, we strive to analyse every situation to provide the best possible outcome.

Through every daily conversation with you, every comment, improvement and response, we reach the gratifying experience of witnessing all our efforts become a tangible reality. This becomes our reward, our function, purpose and sense, and provides us day in and day out, with the passion and power required to invest one hundred percent of ourselves in every decision, actions and thought.

Our values

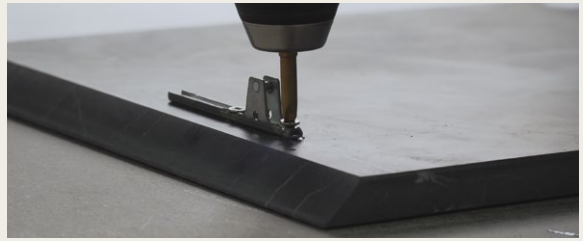

Our values reflect the path we want to build and the kind of company we aspire to be. They are a shared reflection of what we would like to contribute to the world and how we would like to contribute to it. Joining or interacting with Inbani means taking responsibility for these values.

INBANI DESIGN

01. *Quality Test*

All our products go through several quality tests since the beginning of their production process to ensure our commitment and quality.

02. *Specialized*

We have a skilled technical department to provide support and technical drawings to our clients with a response time within 24-48 working hours

03. *Warranty*

All our products have three years of warranty.

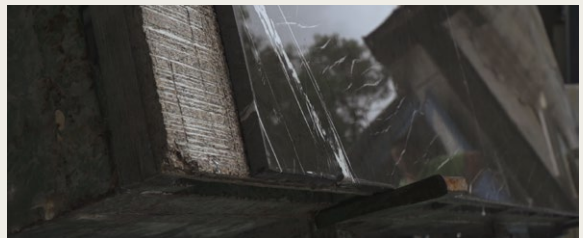

04. *Design*

Being always at the design forefront, studying the continuing needs and keeping our essence and brand identity.

05. *Made in certified*

All our products are made in the European union and own CE marking. Inbani uses raw materials, hardware and pieces from leading brands and latest market trends.

06. *Inbani Green*

Our products are made with nature in mind. We enjoy being kind to earth, that is why we use nature-friendly packaging and processes.

EDGE

Nendo

Ranging from washbasins, bathtubs and furniture including storage cabinets, wall-mounted shelves, and benches, to bathroom accessories such as mirrors and towel racks, the full lineup of the series is a remarkable assembly of over 30 items. Each item is designed with a minimalist linear aesthetic to seamlessly blend into any space with endless combinations. The common feature is the flared edges, which serve multiple functions depending on usage—handles for cabinet doors and for moving benches, grips on bathtubs, or as towel racks and splash-free washbasins. Characterized by the shared detail, the collection is named “edge.”

M M X X I I I

The common feature is the flared edges, which serve multiple functions depending on usage—handles for cabinet doors and for moving benches, grips on bathtubs, or as towel racks and splash-free washbasins.

“Each item is designed with a minimalist linear aesthetic to seamlessly blend into any space with endless combinations.”

EASE

Note Design Studio

The creation of a different bathroom collection, at the same time focused on everyday life. Ease was born under this premise. A collection made to care for those special moments of joy and relaxation.

The bathroom is a unique space at home, the only room where you can be alone and feel some peace. You start and end your day in this space, so it is created a collection that works as a base for those moments of well-being. Understanding the bathroom as that place of retreat and introspection, the pieces were designed. The aim is to enhance the functionality and simplicity as the foundation of the collection. When you enter this space, you expect to disconnect from the world, to have your own environment where everything is familiar, where pleasure comes from basic actions through simple gestures, far from the complexities and hustle of the outside.

M M X X I I I

“

The bathroom is a unique space at home, the only room where you can be alone and feel some peace.

You start and end your day in this space.

“

NOTE DESIGN

Ease tries to capture happiness through naturalness and simplicity. Basic shapes that contrast with each other, uniformity and a palette of soft and natural materials; make Ease's designs an invitation to relaxation.

HERITAGE

Patrick Norguet

As for each new collaboration Patrick immersed himself in the universe of the young spanish brand in order to understand the philosophy and to draw a singular collection in harmony with the DNA of Inbani.

“I imagine the bathroom as a special place, a room to live in, a place of intimacy or the relationship to time different. “I like to think and design objects that cohabit in a space. Like small architectures, they compose a landscape which evolves according to of their users. What I wanted for this Heritage collection was to design elegant and sensual objects with an assumed personality. Inspired by ancient architecture and columns. These are bold and monolithic pieces, but these qualities then contrast with the more worked forms inspired by the columns of antiquity, vertical grooves that give the object a rhythm and a vibration”.

The name “Heritage” giving to the collection implies the concept of something that we received from the past. This is the main idea of the collection. Our Greek ancestors have left us a legacy through the architectural principles presents on the constructions of their classical main currents (Doric and Ionic) that Norguet and Inbani reinterpret in a most essential way giving rise to a classicist but contemporary collection.

M M X X I I I

“

Balance is the main characteristic of Heritage pieces. Thanks to their harmonious proportions, these designs manage to generate a feeling of stability and serenity.

“

PATRICK NORGUET

Shadows are capable of balancing our sensations and they change throughout the day. In the morning, a powerful and contrasted lighting invites us to be prepared for a new day; while at night, the soft and relaxing lighting brings us calm and comfort.

In any interior design project, the lighting must generate shadows to get an effect on the atmosphere. They must provide dynamism and cause the space to obtain its own personality.

A reinterpretation of the basic premises of Greek architecture brought to the present by the designer Patrick Norguet through an exercise of synthesis of its fundamental characteristics. The principle of vertical grooving that gave a sense of sobriety and slenderness to the Greek ancient buildings is applied on a smaller scale within this collection.

STRATO

An exclusive collection of minimalistic shapes, the Strato collection allows the furniture to adapt to every project. This collection is the most versatile and practical in our catalogue.

Strato is a combination of wall mounted units and cabinets. The customization of this range offers different casing and exterior possibilities for the vanity units, based on the selection of the drawer opening system and the design choice for the sides of the unit. Drawer units are available in different finishes like: Matt lacquer, Textured lacquer, Glossy Lacquer; S1, S3 and S4 Woods; and MDi.

M M X X I I I

Strato Marble

“

Strato is an elegant and flexible collection. Its modular shapes adapt to different spaces and its versatility of finishes allows it to adapt to different types of projects and environments.

“

ARC & GRATE

Norm Architects

There is something soothing and elegant about repetition and the continuing contrast between light and shadow. The linear rhythm has always been a strong intervention in historical design and classical architecture, so by implementing this element in furniture design we manage to recreate a fraction of this feeling in a smaller scale.

Normally grates are experienced in a much more industrial and rough environment, but by continuing the detail of the repetitive line, the cabinets become design objects themselves. This gives endless possibilities in expressions regarding the use of materials and textures.

The simple design also allows the unit to have an integrated washbasin or a top mounted washbasin. To maintain a modern design detail on a very generic design, it is important to keep the focus on the linear and grated detail you see on the cover on all cabinets. An innocent but strong detail that repeat itself in the integrated sink as well.

Grate collection plays on a tactful as elegant palette of raw materials and colors such as marble, wood or metal.

M M X X I I I

Shadows are capable of balancing our sensations and they change throughout the day. In the morning, a powerful and contrasted lighting invites us to be prepared for a new day; while at night, the soft and relaxing lighting brings us calm and comfort.

In any interior design project, the lighting must generate shadows to get an effect on the atmosphere. They must provide dynamism and cause the space to obtain its own personality.

PARAL

Victor Carrasco

Rigorous but gentle. Paral is the pursue of a conclusion in bathroom area. Far away from passing fashion, its cared proportions are timeless solutions that define this collection as subtlety worked with an iconic character.

Parallel lines are generated by vertical handles built with innovative materials that convert the collection into an architectural must.

This collection is a combination of washbasins, wall mounted units and cabinets. The construction system for the units in this collection is entirely mitred; fronts with sides and top, as well as sides with top.

The different washbasin types are available in Solidsurface, UHS Colour Coating or Marble. Drawer units are available in five different finishes: Matt lacquer, Textured lacquer, Glossy Lacquer, S3 and S4 woods.

M M X X I I I

“

Paral collection allows you to find yourself. A balanced, subtle and avant-garde designs that flood the space with a feeling of calm. Through the pieces of this collection everyone can reach their own interpretation of harmony.

“

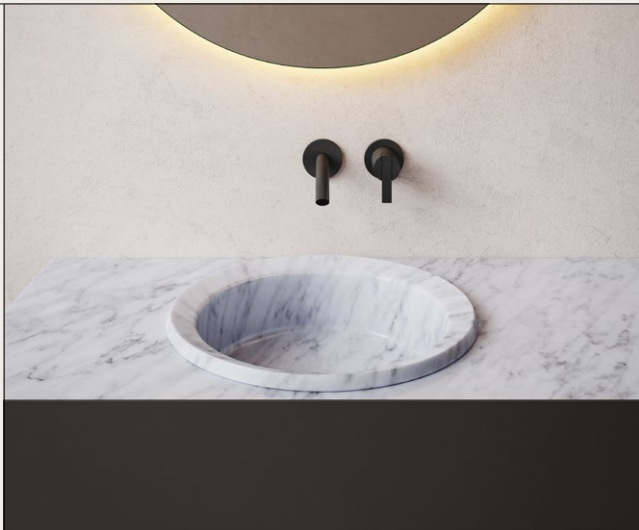

VICTOR CARRASCO

WASHBASINS

Washbasins are an essential element in any bathroom space. Inbani offers a wide selection of designs so you can choose the washbasin that best suits the concept and aesthetics of your bathroom. Our range covers a wide range of washbasin styles. Expressive shapes together with carefully crafted designs make these products exclusive design objects.
