

LUMINA

GLASS DESIGN

LUMINA

GLASS DESIGN

There is a new way to experience the bathroom.
It's called Lumina.

Crafted in VetroFreddo® this bathtub represents the excellence of research and innovation: a material first introduced in the industry by Glass Design, now evolved into a true expression of high-end interior design.

TRANSPARENCY THAT INSPIRES

The purity of the material reveals itself through its extraordinary transparency, enhanced by the Comfort Surface finish: a soft, velvety satin texture that elevates the sense of well-being.

COMFORT YOU CAN SEE AND FEEL

The rounded edge naturally embraces the body, increasing comfort while enhancing the visual effect of the translucent surfaces.

LIGHT THAT SUPPORTS, NOT JUST ILLUMINATES

At the heart of Lumina is its integrated lighting.

It is not just illumination: it is atmosphere.

It is presence.

The light surrounds the bathtub, creating a stunning floating effect (Registered Design), as if it were suspended in space.

It does not simply illuminate: it supports, transforms, and inspires.

A SENSORY EXPERIENCE

Inside, the light flows through the water, creating unique reflections and color effects in constant motion. Every bath becomes an immersive experience engaging sight, touch, and perception.

Lumina is a new way of experiencing space through light.

Lumina: where light takes shape

LUMINA

Dark Fumè

A work of art sculpted in the transparency of *VetroFreddo®*. Lumina Fumé is designed to transform the bathroom into an emotional space, where design, light, and material blend together in perfect harmony.

Its elegant and refined shapes glow from within thanks to the integrated lighting, creating a captivating floating effect that enhances its depth and fills the room with a warm, sophisticated atmosphere.

Striking yet essential, Lumina Fumé fits naturally into any interior setting — from contemporary spaces to the most exclusive environments — becoming the true centerpiece of the bathroom.

The bathtub can be perfectly paired with the Global Murano Fumé washbasin, creating a coordinated project of remarkable aesthetic appeal, where transparency, reflections, and light interact in complete harmony.

An icon of style created for those who wish to experience design as an everyday emotion.

LUMINA

Dark Fumè

The elegance of mystery takes shape

Inspired by sophisticated shades and the delicate reflections of filtered light, Lumina Fumé interprets color as an expression of character and refinement. Its smoky grey-burnished tones create visual depth and give the bathtub a discreet yet distinctive scenic presence.

LUMINA

Amber

Lumina Amber is born from the meeting of innovation and aesthetic memory. The warm transparency of VetroFreddo® gives the bathtub a scenic and contemporary presence, perfectly harmonized with classic and elegant interiors. The amber tone becomes the guiding element of the project, creating visual continuity between innovative materials and timeless surfaces.

Lumina Amber interprets contemporary luxury through light, color, and transparency.

It can be paired with the Globall Murano Amber washbasin, the same warm tones as the bathtub, reinforcing the balance between contemporary design, craftsmanship, and material research.

LUMINA

Amber

The warmth of light takes shape.
Inspired by the golden hues of sunset and the natural radiance of
amber, Amber envelops the space in a feeling of warmth, comfort,
and well-being.

LUMINA

Satin Amber

The bathtub that transforms the bathroom into a sensory atmosphere of pure emotion.

Crafted from the exclusive *VetroFreddo*®, Lumina Amber Satin combines contemporary design, refined materiality, and luminous emotion in a perfect balance of aesthetics and well-being.

Inspired by the warm hues of natural amber and the soft glow of sunset light, it interprets wellness through velvety surfaces and delicate reflections. The satin soft-touch finish softens the brilliance of *VetroFreddo*® and diffuses light evenly, creating an enveloping, elegant, and relaxing atmosphere.

Elegant, striking, and inviting, Lumina Amber Satin embodies contemporary luxury through the harmonious interplay of light, material, and emotion. It can be matched with the Global Murano washbasin in satin Amber finish.

LUMINA

Magnetic blue

LUMINA - Magnetic Blue
An icon of light and depth.

Lumina Magnetic Blue transforms the bathroom into an emotional space, where *VetroFreddo®* comes to life through intense reflections and enveloping transparencies. Its crystalline surface captures natural light and reflects it in endless shades of magnetic blue, evoking the deep calm of water and the timeless elegance of contemporary design.

The integrated lighting with floating effect enhances the sensation of lightness, making the bathtub appear suspended in space like a luminous sculptural element. A striking detail that enhances the purity of *VetroFreddo®* while creating a sophisticated and relaxing atmosphere.

The bathtub can be perfectly paired with the Laguna Murano Blue washbasin, creating a coordinated project of remarkable aesthetic appeal, where transparency, reflections, and light interact in complete harmony.

LUMINA

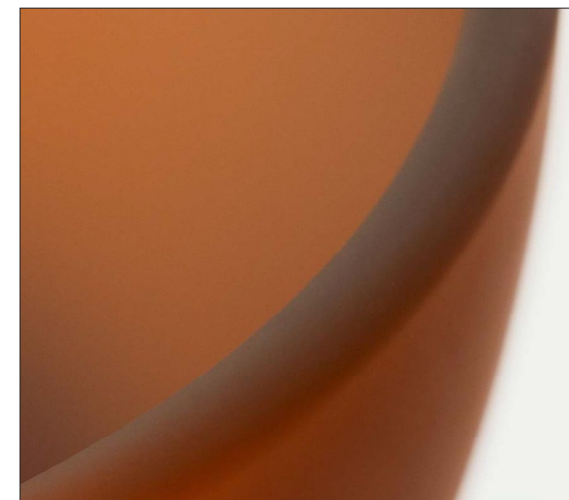

Magnetic Blu

The essence of relaxation takes shape.
Inspired by the depth of water and the serenity of the sky, Magnetic
Blue envelops the space in a sense of calm and harmony.

Technical features – Lumina

MATERIAL

Made of *VetroFreddo®*, an innovative material developed by Glass Design, durable and highly performant.

FINISHES

Available in:

- Transparent colors, enhancing depth and light
- Comfort Surface, a soft-touch satin finish, elegant and contemporary

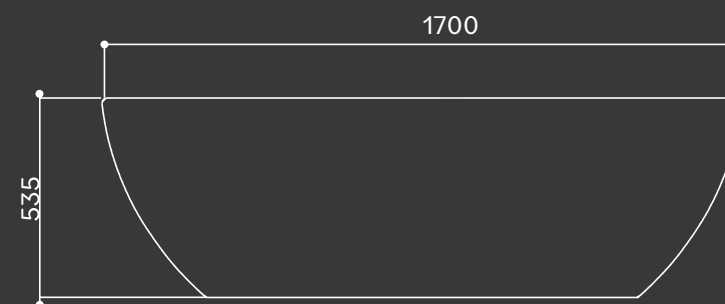

ERGONOMIC DESIGN

- Rounded edge for superior comfort and improved user experience
- Fluid lines that enhance the transparency of the material

LIGHTING SYSTEM

- Integrated LED lighting 24 volt - IP66 - white colour 4000K
 - System with integrated heat dissipation to ensure efficiency and durability
 - Scenic floating effect, making the bathtub appear suspended in light (Registered Design)
 - Diffuse light on the bottom of the tub, creating a “pool” effect
 - Interaction with water to generate unique reflections and color effects
-
- Optional: Dimmer RF / WIFI /N PUSH
Remote Mobile control and voice control (Alexa)

Overall size - Lumina 170

MATERIALE MATERIAL

Il VetroFreddo[®] è un materiale innovativo e raffinato realizzato a mano 100% made in Italy. La sua flessibilità cromatica consente di ottenere risultati estremamente diversi tra loro: da superfici coprenti e materiche fino a effetti trasparenti o traslucidi satinati, capaci di giocare con la luce e creare atmosfere suggestive.

VetroFreddo is an innovative and refined material, handcrafted and 100% made in Italy. Its chromatic flexibility allows for extremely diverse results: from solid, textured surfaces to transparent or satin-finished translucent effects, capable of interacting with light and creating evocative atmospheres.

CURA E MANUTENZIONE CARE AND MAINTENANCE

MANUTENZIONE GENERALE - General Maintenance

Pulire la superficie con acqua tiepida e detergente delicato, usando un panno o una spugna morbidi, non abrasivi, e umidi. Risciacquate bene la superficie e asciugate quindi con un panno morbido.

Clean the surface using warm water and a mild detergent on a soft damp, non-abrasive, cloth or sponge. Rinse with warm water on a soft cloth and dry using a soft cloth.

MACCHIE DI CALCARE SAPONI O PRODOTTI MINERALI-

Stains of hard water soap or mineral products

Pulire con un detergente anticalcare. Terminare la pulizia risciacquando con acqua tiepida ed un panno morbido. Asciugare quindi con un panno morbido..

Clean using a descaling detergent. Rinse with warm water on a soft, non-abrasive cloth and dry using a soft cloth.

MACCHIE PERSISTENTI o PICCOLI TAGLI-

Stubborn stains or small cuts

Per piccoli danneggiamenti è possibile usare un detergente abrasivo ed una spugnetta abrasiva (es. carta grana 1500 - 3000) levigando con una leggera pressione la parte danneggiata. Terminare con la lucidatura con spugna su flessibile e pasta abrasiva.

Per prodotti opachi non è possibile il ripristino

For small damages it is possible to use an abrasive cleaner and an abrasive sponge (e.g. 1500-3000 grit sandpaper) polishing with a light pressure the damaged part. Finish with polishing with sponge on flexible and abrasive paste.

It is not possible to restore opaque products

ATOSSICITÀ TOXICITY

Il prodotto non risulta tossico o nocivo all'uomo, agli animali e all'ambiente.

The product does not appear toxic to humans, animals or to the environment.
